PROJECTS

Student Management System | JSP, HTML, CSS, JavaScript, Servlet, JDBC

- Developed a desktop-based application to efficiently manage and store user information such as username, RollNo, and marks.
- Implemented features allowing users to update marks dynamically, providing a user-friendly interface. Improving user experience by 30%.

Snake And Ladder Game

- The Snake and Ladder game is a classic board game where players roll dice to navigate a board filled with ladders that advance their position and snakes that send them back.
- The objective is to be the first player to reach the final square, overcoming obstacles along the way.
